

# Home Inventory Checklist

If you had to file a claim, would you be able to list all the contents of your home and their value? Most people simply don't realize how much they actually have, and under the stress of a loss it's easy to forget key valuables in your home.

The best way to make sure you have adequate insurance coverage is to prepare an inventory. This brochure is designed to help you develop such a record.

Completing the following pages will help you determine the amount of insurance that should be carried on your household goods and personal possessions. This record will be invaluable to you in case of theft, fire, or other disaster.

For your protection, take time to prepare this inventory immediately. Be sure to update the file as often as needed to keep it current and make sure to store it in a safe, off-site place.

If you need assistance, please contact your local Germania Authorized Agent. They will be glad to assist you.

## Home Inventory Tips

- Take photos of individual items in your inventory as well as the layout of each room. Store the photos in the same place as this inventory, in a secure place away from your home or in a fire-proof safe.
- Include the serial numbers of all items that have them.
- Keep all receipts for major items in your inventory.
- Take photos of closets and drawers open to show quantities of clothing inside.
- When taking photos of a shiny or reflective surface, hold your camera at a 45 degree angle to avoid glare.
- Update your home inventory at least once a year to ensure that it remains current.
- Add new items to your home inventory as soon as they are purchased and delete items that have been replaced.
- Keep family photo negatives or digital files backed up on disc in a safe place.
- Don't forget about the contents of your pantry, refrigerator and freezer. Food has value and may be reimbursed in case of a loss.

# Master Bedroom

Item	Brand / Model / Serial #	Date Purchased	Cost New	Value Current value Replacement cost
Alarm Clock				C= R=
